

Elaine Bartholomew, Taronza Ellison and Robin Kiernan are part of a team of qualified professionals monitoring among others, security, fire, sprinkler, and environmental alarms at Monitor Controls, Inc.'s 24/7 central station in the heart of Wallingford.

Monitor Controls, Inc. of Wallingford celebrates 35 Years

"It seems like yesterday I was using liquid paper, filing copies of client bills in the four-drawer file cabinet beneath the basement stairs and I had just stopped buying carbon paper." says Patricia L. Yusza, who served as Corporate Secretary for 18 years. "Now the company has an office on Center Street, a lot on Research Parkway for their new facility, an off-premise storage facility, document imaging capabilities and well, lets just say... liquid

paper?"

"Who would have thought 35 years ago when my husband came to me with the idea to start his own security company that it would develop into the premiere security, fire, video and access control corporation it is today working throughout New England and eastern New York, employing over 30 individuals who are more like family than employees?" asks Patricia Yusza.
